#### Approved APB

NAE Approved Acquisition Program Baseline (APB) dated August 5, 2009

## Mission and Description

The JSOW is an air-to-ground weapon designed to attack a variety of targets during day, night, and adverse weather conditions. JSOW enhances aircraft survivability by providing the capability for launch aircraft to standoff outside the range of most target area surface-to-air threat systems. The JSOW launch-and-leave capability allows several target kills per aircraft sortie. The common JSOW variant nomenclature is JSOW-A (Baseline), JSOW-A-1, JSOW-B (BLU-108), JSOW-C (Unitary), and JSOW-C-1 (Network Enabled Weapon Moving Target Capability).

The JSOW program developed a Baseline weapon for use against fixed, area targets. The JSOW Baseline variant includes a kinematically efficient airframe and integrated Global Positioning System (GPS)/Inertial Navigation System (INS) capability, and a BLU-97/B submunition payload. The JSOW-A-1 configuration carries a BLU-111 warhead and is being marketed by Raytheon to Foreign Military Sales (FMS) customers. The JSOW-B variant incorporates the Sensor Fuzed Weapon submunition (BLU-108) into the baseline vehicle. The JSOW-B variant provides a standoff delivery capability against massed armor and land combat vehicles. Production of the JSOW-B is deferred.

JSOW-C and C-1 variants both use the Unitary lethal package, termed Broach, which is produced by BAE Systems. The Broach incorporates an advanced multi-stage warhead, which allows the warfighter to attack blast/frag sensitive and hardened point targets. JSOW-C uses an Imaging Infrared (IIR) seeker with embedded Autonomous Targeting Acquisition (ATA) software, increasing accuracy and lethality. The IIR affords the mission planner precise aimpoint selection and target discrimination. An anti-tamper/anti-spoofing capability was inserted in the guidance electronics unit with FY 2006 production. The JSOW C-1 adds a weapon data link and seeker upgrade to attack moving maritime targets in addition to the JSOW-C stationary land target mission set.

Through adherence to international standards for weapons interfaces and minimized weight and dimension considerations, JSOW is compatible with Navy, Air Force and North Atlantic Treaty Organization (NATO) aircraft. JSOW is a Navy-led, joint program.

## Executive Summary

JSOW (AGM-154) is in the post Milestone III production phase with final JSOW-A dispenser variant deliveries completed in July 2007; JSOW-C Unitary variant production completed deliveries in June 2010. JSOW-C-1 deliveries commenced October 2010 with 27 weapons delivered through December 2010.

JSOW C-1 (AGM-154C-1) is an engineering change proposal (ECP) modification to the JSOW-C Unitary variant which updates obsolete seeker hardware/software and adds a datalink to address the warfighter's Maritime Interdiction Capability Requirement. The ECP effort has experienced schedule challenges due mainly to the datalink development which impacted system-level software development and integration/test progress. The contract was re-baselined in October 2010 in order to align the schedule with the latest revised forecast with Initial Operational Capability (IOC) moving from FY 2012 to FY 2013. The program has demonstrated system level performance in 127 flight test hours during the course of twenty-one successful captive flight tests and a successful Joint Capabilities Technology Demonstration. First free flight test of the JSOW C-1 is scheduled for late FY 2011.

The JSOW program continues to meet all Capability Production Document (CPD) and Acquisition Program Baseline (APB) cost, schedule and performance thresholds.

There are no significant software or hardware issues for this program at this time.

## Threshold Breaches

93.8	N/A	N/A	160.2	N/A	N/A	183.6	183.6

Variance	Cost Variance	Schedule Variance
Cumulative Variances To Date (11/19/2010)	+0.5	+0.4
Previous Cumulative Variances	-25.5	-7.4
Net Change	+26.0	+7.8

### Cost And Schedule Variance Explanations

The net favorable change in cost is due to additional cost to resolve JSOW C-1 Over Target Baseline (OTB) implemented in October 2010. An Integrated Baseline Review (IBR) was held prior to OTB implementation to mutually agree to the updated performance measurement baseline for the program. The OTB was necessary to provide a sound performance baseline to complete the software integration effort and the Development and Integrated test program.

The net favorable change in schedule is due to the extension of the development contract from July 31, 2009, as awarded in the basic contract, to November 13, 2012. The schedule extension was necessary to complete the software integration effort and the Development and Integrated test program.

### Contract Comments

This data is for Order 2002 on N00019-05-G-0008

Total contract cost includes \$107.2M AGM-154C-1 development/modification and \$52.1M seeker obsolescence redesign effort. Earned Value Management System data is being reported at the combined total level for these efforts.

The difference between initial contract price and current contract price is related to the exercise of additional option years.

Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price At Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
80.9	N/A	337	575.7	N/A	2118	575.7	575.7

**Cost And Schedule Variance Explanations**

Cost and Schedule variance reporting is not required on this FFP contract.

**Contract Comments**

The difference between the initial contract price and the current contract price is related to the addition of annual procurements for JSOW-A and JSOW-C in FY 2004, FY 2005 and FY 2006.

Quantity of 2118 includes 104 weapons for Turkey.

This firm fixed price contract is greater than 90% complete and will not be reported again after this submission.

**Appropriation: Procurement**

Contract Name **AGM-154C FY07/08/09/10 Production**  
 Contractor Raytheon Company  
 Contractor Location Tucson, AZ 85706  
 Contract Number, Type N00019-07-C-0093, FFP  
 Award Date January 31, 2007  
 Definitization Date January 31, 2007

Initial Contract Price (\$M)			Current Contract Price (\$M)			Estimated Price At Completion (\$M)	
Target	Ceiling	Qty	Target	Ceiling	Qty	Contractor	Program Manager
101.1	N/A	388	462.5	N/A	1555	462.5	462.5

**Cost And Schedule Variance Explanations**

Cost and Schedule variance reporting is not required on this FFP contract.

**Contract Comments**

The difference between the initial contract price and the current contract price is related to the addition of annual procurements for JSOW-C and C-1.

Current quantity breakdown is as follows: FY 2007 (USN-388, POL-80, Greece-40), FY 2008 (USN-360, 228J-15, FIN-10), FY 2009 (USN-280, MMRCA-2, MMRCA (JSF)-2, 228J-55, FIN-10) and FY 2010 (USN-313).
